

LineView™ – System of choice for Coca-Cola Enterprises

Coca-Cola Enterprises (CCE) chose the LineView™ system as the standard production line monitoring system for their Supply Chain Division. Over a three year period, LineView™ has been implemented on every production line in Europe to help increase efficiency and reduce manufacturing costs.

● ● ● ● ●

The problem

With manufacturing sites across Europe, it was no surprise to learn that there were many different systems being employed to manage plant performance and that they were achieving mixed results. The systems varied from manual to fully-automated data capture. The business wanted a single, cutting-edge solution across all their facilities to standardise the system and the approach through which site teams were reviewing performance and driving effective actions to improve plant productivity.

How we helped

After a 12 month benchmarking process, LineView™ was chosen as the clear system-of-choice. Developed from an operational perspective, LineView™ presents performance information in a format that helps line teams instantly and accurately identify the critical area of focus. Applying **6 Loss Analysis** and **Theory of Constraints** principles, LineView™ identifies the effect of all downtime on the overall line output without the need for any operator intervention, and accurately pinpoints the true cause of productivity loss. The visual user-interface presents **actionable information** in an easy-to-read format, enabling rapid decision-making and allowing production teams to focus their efforts on taking effective-action rather than spending time analysing and interpreting the data.

continues over...

“ LineView™ is the single most powerful manufacturing tool I’ve seen during my 15 years in operations management.

Richard Davies
Vice-President Operations,
Coca-Cola Enterprises Ltd

The system has been implemented on more than 70 production lines across Coca-Cola Enterprises.

As part of a three-year development project, LineView™ Solutions have been working with Coca-Cola Enterprises to further enhance the functionality of the system to meet the new challenges of the business as they hit ever-higher levels of performances, including defining the rigour and routines around use-of-data that has driven on-going, sustainable performance improvement.

LineView™ is an extremely flexible tool that delivers long term sustainable results.

The results

- Site-wide increase in OEE of **20%** inside 24 months
- Improvement of **6%** across the entire enterprise
- System ROI delivered based on logistics saving alone
- Overall improvements in yield and quality consistency
